We have a growing reputation for quality delivery, contract and risk management.

The Three Counties Consortium is managed by a experienced and well-respected team, and led by Worcester College of Technology, providing access for providers to resources unrivalled in the sub-region.

With excellent audit results, high satisfaction levels from employers and clients, the Consortium comprises a unique and innovative mix of colleges, third sector organisations and private providers who jointly have achieved considerable success in engaging employees and other clients through employers, using a mix of European Social Fund (ESF), mainstream and other funding streams, together with commercial activity to deliver high quality learning programmes.

Using sub-contracts to match supply to client demand, we ensure all our providers have years of experience in both training individuals and working with various client groups. They understand the marketplace and can tailor their provision to suit many needs.

Providing an independently audited and inspected range of courses, the Consortium delivers high quality learning to clients and a high level of support to it's members at low cost.
